

High Definition Output Card Makes GlobeCaster a Low Cost HD Solution

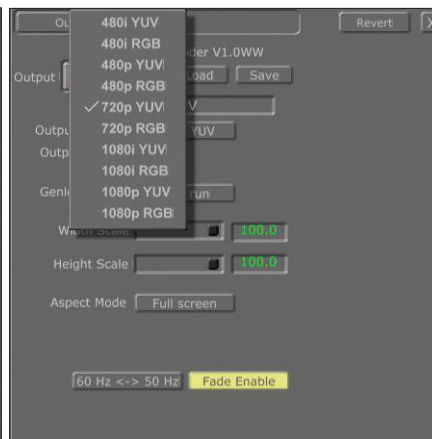

Increase the flexibility of your standard definition GlobeCaster by adding an HD Output Card.

Adding an HD Output Card* represents a tremendous opportunity for GlobeCaster users to update their production capabilities, including:

- **State-of-the-Art Technology** The HD Output Card uses the latest, high-quality circuitry manufactured by Gennum, an industry leader in video processing technology.
- **Presentation Application** A digital DVI connector allows for HD quality output to projectors and monitors in a live event or presentation environment.
- **Broadcast Application** Component HD connectors (RGB or YUV) allow for the highest professional broadcast quality output to broadcast transmission and monitors.
- **Simultaneous Output** The HD Output Card allows users to produce program output through both the DVI connector and the Component HD connectors at the same time.
- **User Defined Resolution** Users can choose resolution from 480i to 1080p (NTSC & PAL)
- **Custom Scaling** Select between 4:3, 16:9, Full Screen or Custom on the output card.

HD Output Settings Panel

Resolution can be scaled from interlaced SD to progressive HD

Supports 4:3, 16:9 and Custom Aspects

HD Output Card for GlobeCaster
\$2,395

*Require GC Software Version 3.3
